Meeting Notes 10/10/18

Notes by Chris McLaughlin

Attendees:
- Chris McLaughlin
- Alex Peterson
- Edwardo Rivera

Meeting Length: 2hrs

Meeting Topic: Initial discussion on the project. Discussed the roles of each developer in this project. The name of the project was chosen: Project "ARCmuse". The Project will be a website using angular and bootstrap that randomly generates a scenario for architects to create to help promote creativity.

Iteration 1:
Name of project: ARCmuse (Architecture Randomization Creator Muse)
Roles of each developer:
Edwardo: Create the modeling for the random generator
Chris: Research Angular/Bootstrap and create the webpage
Alex: Design Logo, choose color palette, and separate project cases
Each member signs up for GITHUB and joins the repository.
Iteration 1 deadline: October 28th at 11:59pm

Additional Notes:
Generation order for scenario:
        Terrain -> Area -> Square foot -> Use Case -> Style

Layout Simple:
```
---------------------------------------------------
-                                        -
-              Text fields               -
-                                        -
-                                        -
-               button                   -
---------------------------------------------------
```
